

Newborn hearing screening in Banyswif through 2018

- The coverage is determined in relation to thyroid hormone deficiency test as most of Egyptian newborn go through this test.
- More than 100% is due to doing the hearing test for newborn from the surrounding PHCU that don't have OAE device.

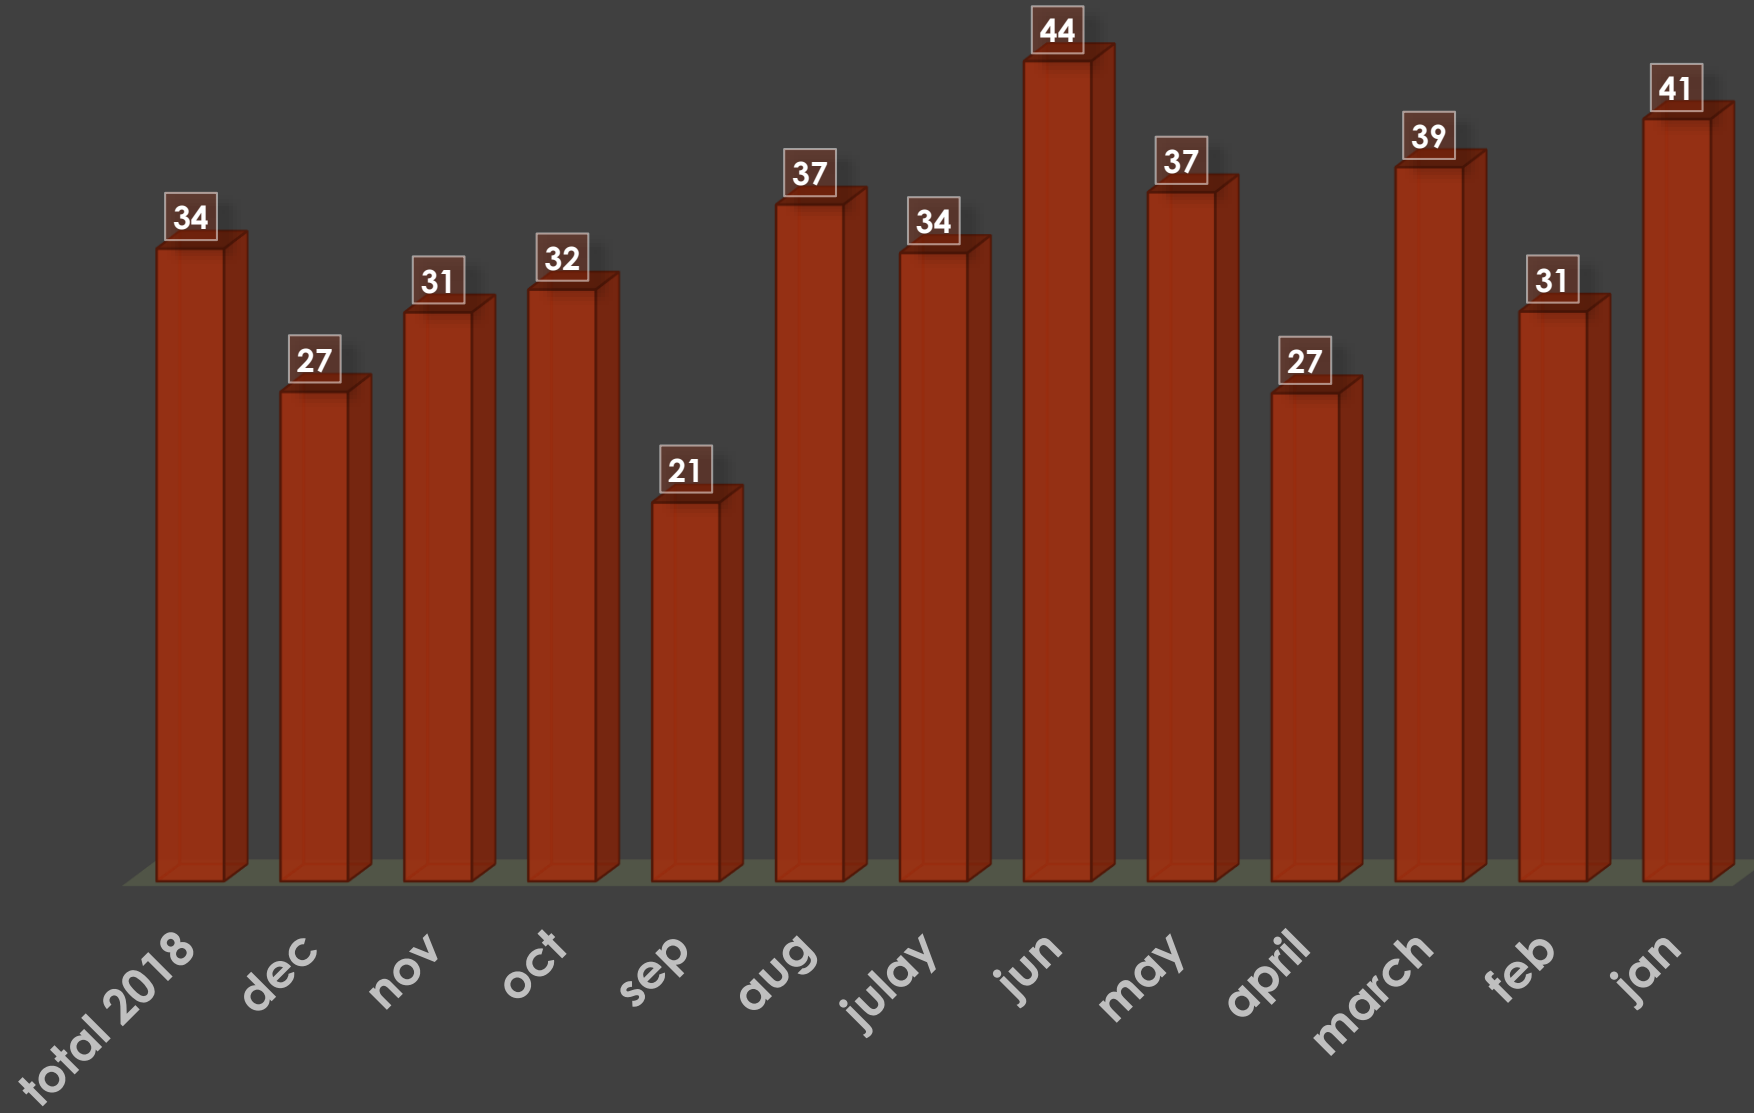

The coverage throughout months of 2018

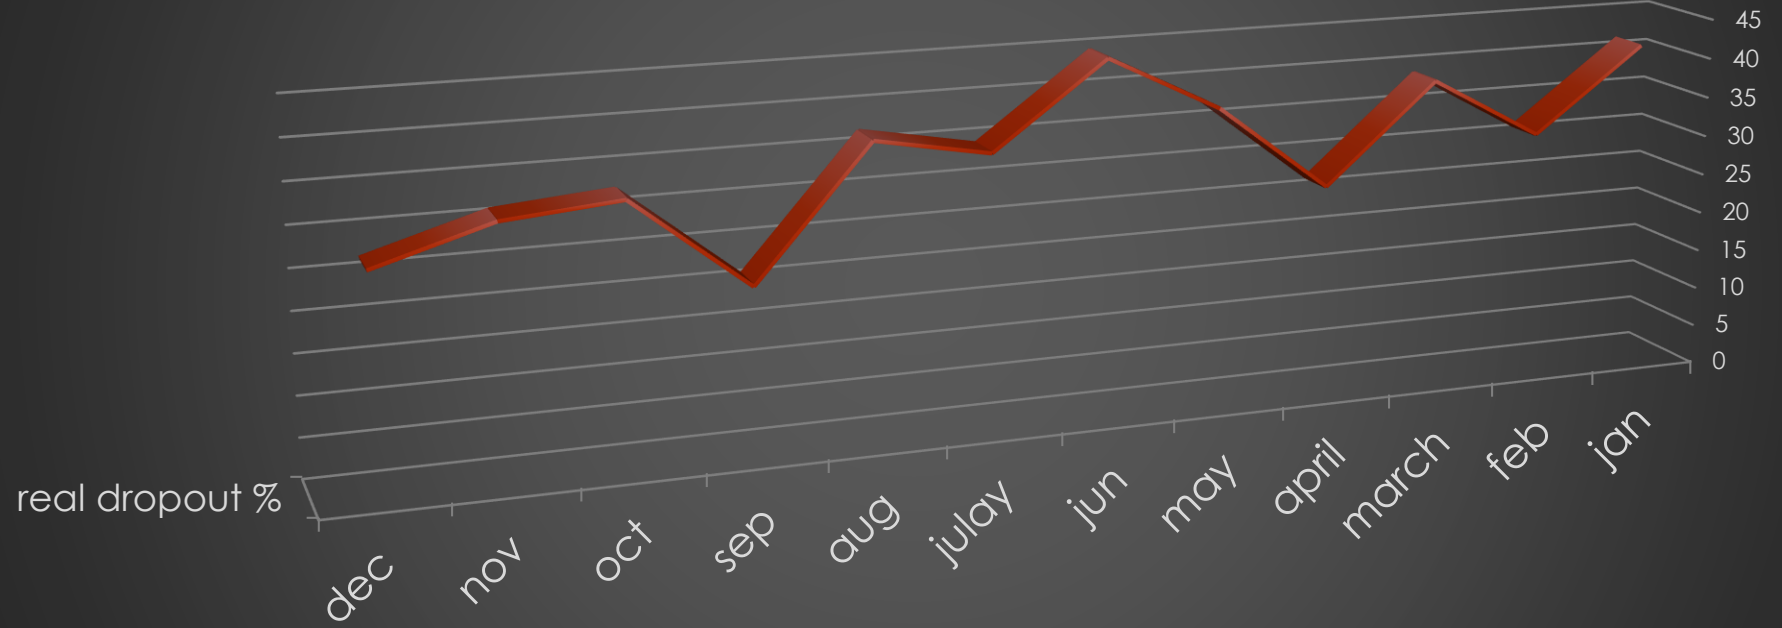

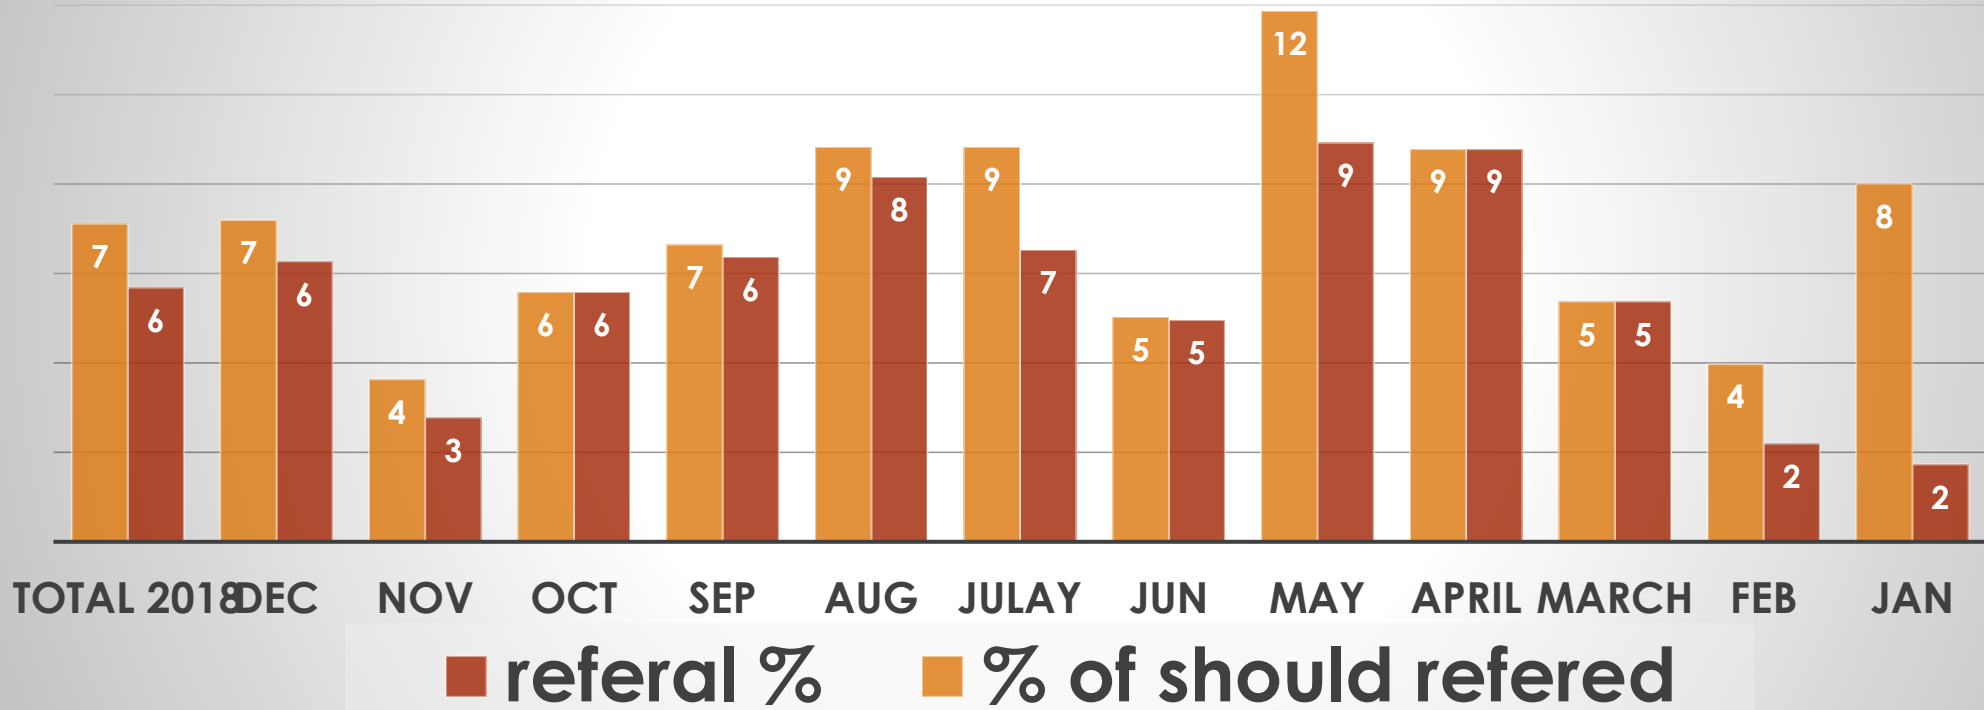

This comparison indicates the nurse understanding of the statistical meaning

REAL DROPOUT %

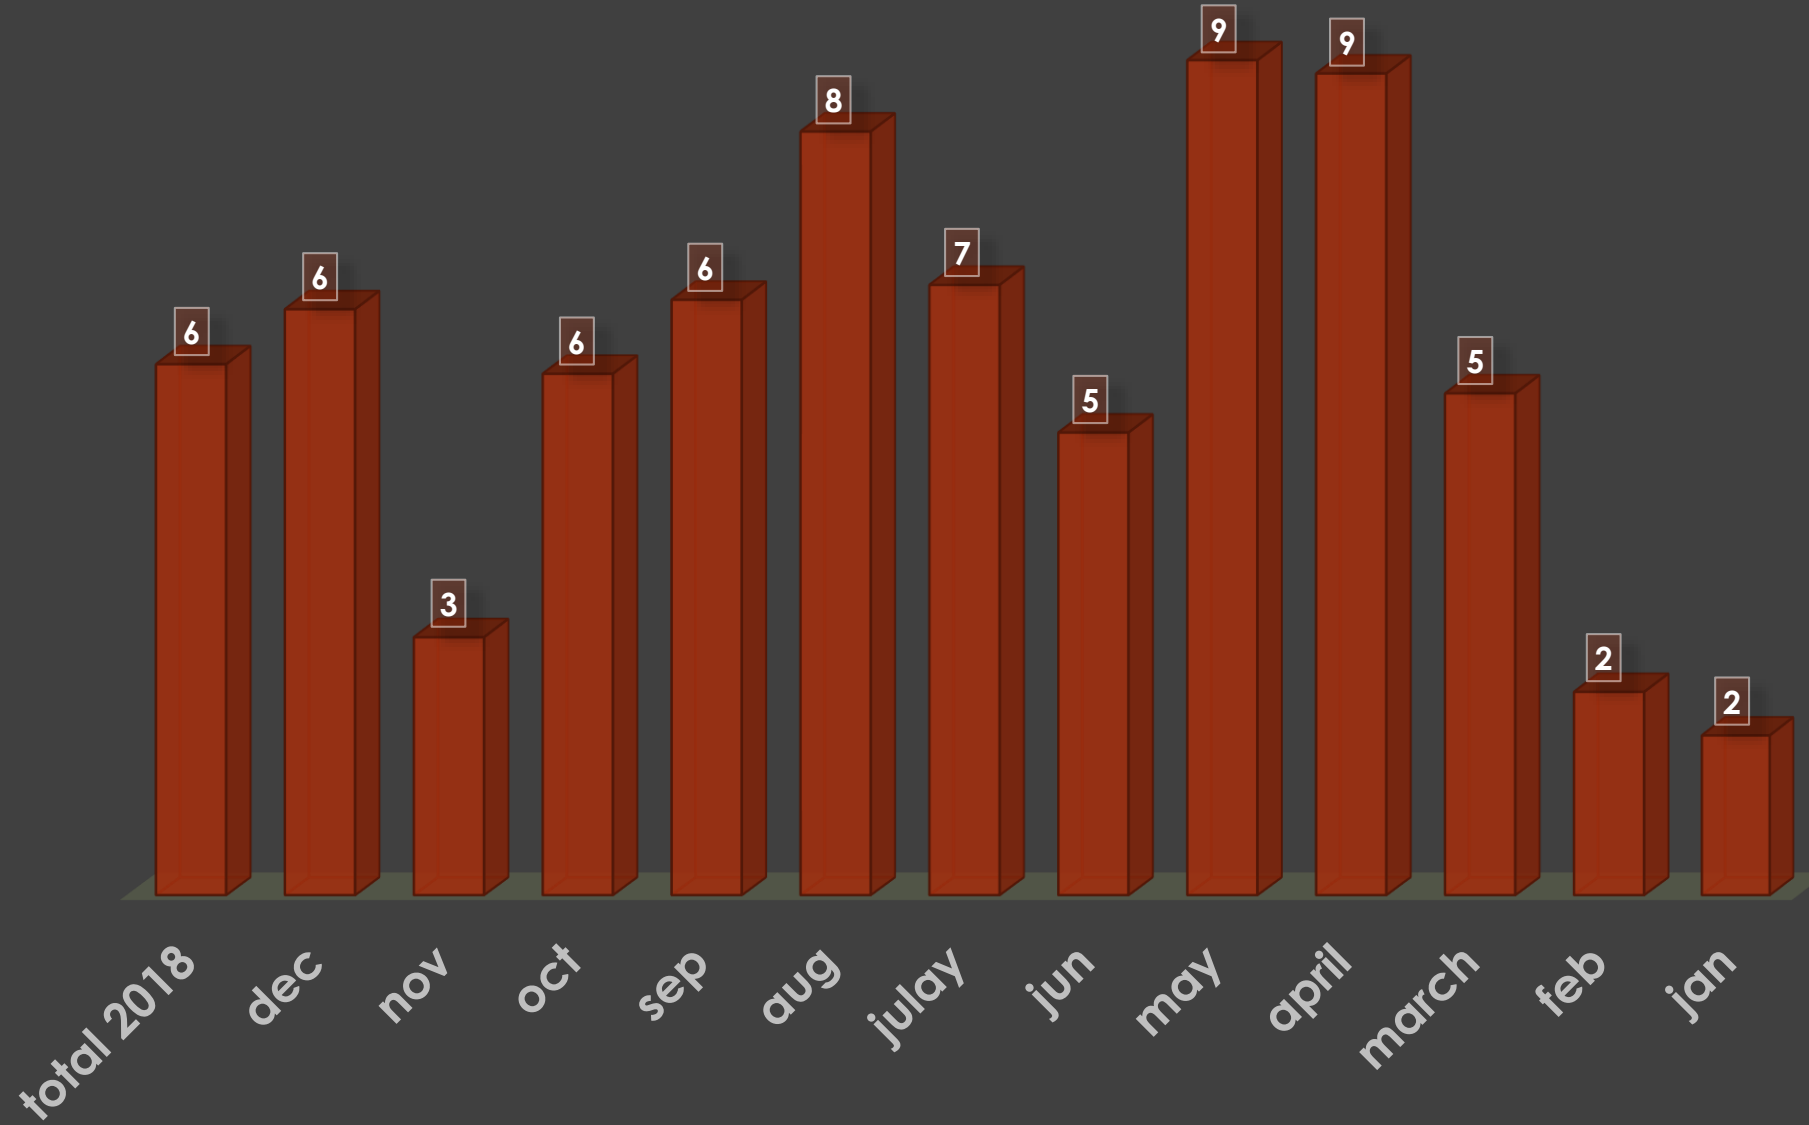

real dropout %

Comparison between no. of cases referred to the hospital by the nurse and no. of cases that should be referred. The difference in both is due to that the nurse do not understand that the uncompleted cases in the 2nd HS should be referred to the hospital.
